DETAILED ACTION

Priority

Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Denmark on 20 December 2002. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth this office action. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the

Art Unit: 3745

declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

In claim 2, line 4, "and +12°" has been deleted,

In claim 4, line 2, --of-- has been inserted between "areas" and "the blades",

In claim 8, line 2, --of-- has been inserted between "areas" and "the blades", and

In claim 16, line 1, --of-- has been inserted between "areas" and "the blades".

The above corrections have been made to correct typographical errors. The change to claim 2 has been made since it is apparent applicant intended to delete all of limitation ", preferably of between -12° and +12°" as evidenced by claim 12.

EXAMINER'S REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed by a novel improvement in ice abatement of wind turbines. It is not known in the art of wind turbines to utilize the generator as a motor and adjusting the pitch of the blades such that icing occurs in areas of the blades where an ice abatement means is provided. U.S. Patent No. 7,042,109 briefly notes that a wind turbine generator can be used as a motor for low speed startup (column 20, lines 21-24) and U.S. Patent No. 6,890,152 discloses an ice abatement means along the leading edge of a wind turbine blade. However, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to combined the teaching of U.S. Patent No. 7,042,109 and U.S. Patent No. 6,890,152 to yield the method as claimed.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The published patent application of Wobben discloses a water/ice repellant coating for use on wind turbine blades.

CONCLUSION

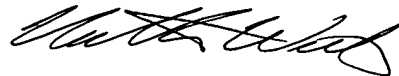

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
